

PRODUCT INFORMATION

P.C. RADIATOR SEALER, 250 ml

Art. No. 60302

RADIATOR SEALER seals leaks from small and difficult to find leaks, such as hairline cracks in the radiator or cylinder head, leakage from the water pump seals, hoses or porous spots in heat exchanger, rockfall, etc.

Properties

- Excellent agent combination with reliable and consistent sealing efficiency
- Doesn't cure in water (durable flexible) and is easy flushing when required
- Useable for all radiators
- Compatible with all current antifreezers and cooling liquids

Areas of application

It seals in cooling and heating systems to prevent loss of cooling water and seal sweating. It is tolerant against leakage of sealing rings of the water pumps and part of cylinder head cracks. It is also applicable to preventive protection against coolant loss and corrosion.

Application

Shake can well before use. Run the heating system. Add content of the can to the cooling system at the running engine. Run the engine for 10 minutes.

The expiration date is 2 years after production date under the permission that the product is stored in a dark, dry and cool place.

Our data sheets and prints should advise in all conscience. The content is regarding to treatment and application an unenforceable obligation as we have no bearing on it. Modifications which result in improvement are reserved.
