

## PRODUCT INFORMATION

### P.C. OCTANE BOOSTER, 250 ml

Art. No. 60042

OCTANE BOOSTER increases the octane number of fuels with too low octane content and for motors with higher needs. Protects valve-seats. Increases the cold start properties and the full load performance. Cleans the whole fuel-system and cares for a permanent smoother idle. Removes and prevents wear on valves and combustion chamber.

#### Properties

- Increases the octane number
- Selected agent combination improves the motor power and increases the operational safety
- Disengages residues
- Protects valve seats from exceeding wear
- Binds water in the tank and in the system
- Ensures a consistent combustion process and improves the CO-reading

#### Areas of application

To protect valves seats with unleaded fuel, even when the valves seats need leaded fuel. To use at malfunctions in idle speed and part load through residues on injection nozzles, valves and in the combustion chamber.

#### Application

250ml ration package: After getting fuel, add content of can in use with the filling pipe to the fuel tank.

The expiration date is 2 years after production date under the permission that the product is stored in a dark, dry and cool place.

Our data sheets and prints should advise in all conscience. The content is regarding to treatment and application an unenforceable obligation as we have no bearing on it. Modifications which result in improvement are reserved.
