

PRODUCT INFORMATION

P.C. RADIATOR CLEANER, 250 ml

Art. No. 60312

RADIATOR CLEANER is a special combination of active ingredients for cleaning the entire cooling system with calcification and sludge deposits.

Properties

- Cleans intensively und reliably
- Active in all cooling liquids and thereby neutral against seals and aggregates
- Brings back an optimal cooling effect for the engine
- Includes neither aggressive acids nor brines

Areas of application

It is for malfunctions of thermostat valves and regulating mechanisms caused of soiled cooling aggregates and control sections.

Application

Add content into the cooling system. Run the engine and the heating system for approx. 30 min. After ignition off and cooling down the engine, drain off the cooling fluid and flush the radiator with water and refill it again according manufacturer's specifications. Content sufficient for up to 12 liter cooling fluid.

The expiration date is 2 years after production date under the permission that the product is stored in a dark, dry and cool place.

Our data sheets and prints should advise in all conscience. The content is regarding to treatment and application an unenforceable obligation as we have no bearing on it. Modifications which result in improvement are reserved.
