

PRODUCT INFORMATION

P.C. CERAMIC MOTOR TREATMENT, 250 ml

Art. No. 67002

CERAMIC MOTOR TREATMENT contains ceramic material that has emerged from the development of space industry. As a complement to the motor oil you will gain excellent results. The ceramic material adheres to the critical points of the motor. The friction and wear is significantly reduced. The effect is independent of the motor oil change.

Properties

- Considerably longer life cycle
- Considerably less wear by up to 25 %
- Performance increase by up to 15 %
- Reduction of fuel consumption by up to 10 %
- Smoother running of the motor
- Long lasting effect, over 50.000km

Areas of application

It is suitable for gasoline, diesel and LPG motors and can directly be added to all conventional motor oils.

Application

Add content of tin into the motor oil. By driving some kilometers the additive becomes effective.

The expiration date is 2 years after production date under the permission that the product is stored in a dark, dry and cool place.

Our data sheets and prints should advise in all conscience. The content is regarding to treatment and application an unenforceable obligation as we have no bearing on it. Modifications which result in improvement are reserved.
